Bourdon Gauge

Product Image

Description

Used to measure actual gas pressure, and not gauge. Consist of a circular gauge. The dial has dual scale reading 0 to 50 Lbs / in² and 0 to 3.5 kg / cm² pressure. The case has a transparent perspex back to clearly observe the working of the gauge mechanism. A rifflled tubule present at its one side provides gauge connection through rubber tubing. A thick black pointer needle against white dial provides easy reading of scale directly giving the actual pressure. Mounted on heavy cast-metal base for stability.

Custom made configuration is available for developing countries or Ministry of Education Tenders
