CIRCULAR COIL FOR DEMONSTRATING FIELD LINES

Product Image

Description

Frame (Metal or Plastic): Consists of a vertical structure with parallel rods.

Thin Metal Rods: Freely suspended at the top, allowing movement when an electric current flows through.

U-Shaped Magnet: Positioned at the bottom of the device to generate a magnetic field perpendicular to the current passing through the rods. **Electrical Connection Points:** Located at the top, with one red and one black terminal for connecting the power supply. **Stable Base:** Supports the device and secures its components in place.
