# Dielectric Constant Experimental Kit (Resonance Method)

## Product Image

## Description

---

To calculate Dielectric constant of solids. The instrument consists a high frequency R. F. Oscillator of tuneable frequency with outer gang condenser, optimum tuning is indicated on meter. The change in meter reading after placing Dielectric material between parallel plates can be detected and difference can be noted. workable on 220v.AC, 50Hz.

Dielectric Constant Experiment consists following:-

- 1). Dielectric constant apparatus.
- 2). Variable Gang Condenser.
- 3). Test Capacitor (Solid Gang Condenser).
- 4). Three type of Bakelite sheets for Dielectric material.
- 5). Two set of Leads.

-

Dielectric Constant Experimental Kit (Resonance Method)

**Catalog No. 101010**
