Free Fall Apparatus

Product Image

Description

Base with Sensor: A sturdy base equipped with a sensor to detect the fall of the object. Metal Rod: A graduated metal rod with a maximum length of 1.5 meters, used to measure the distance fallen by the object. Balls of Different Materials: A set of balls made from various materials (steel, plastic, wood) to test how different materials behave during free fall. Electrical Connecting Wires: Wires used for connecting the sensor and other components in the circuit. Electric Timer: A timer to measure the time taken for the object to fall, allowing for calculation of acceleration due to gravity.
