Hand Grip Dynamometer

Product Image

Description

CONSTRUCTION:

Hand Grip Spring Dynamometer: For isometric exercise.

(a) It consists of two parallel metallic hollow bars, called the handles. These are connected together through a flexible elliptical metallic strip. The whole apparatus can conveniently be held within the palm and when compressed, metallic strip offers a great deal of resistance to compression.

(b) The handle is adjustable to fit the grip length of the hand. This hand dynamometer measures grip strength up to 50 Kg in 100 grm graduations.

(c) A graduated pressure scale is also provided between the bars for direct estimation of copression force.
