High Precision Water Bath

Product Image

Description

This water bath provides consistent temperature control over the range ambient to 110°C for numerous applications where temperature uniformity and stability are important

specially for experiments in research work.

Construction: The inner chamber consists of thick stainless steel tank housed in a powder coated outer case filled with high-grade insulation to prevent heat loss. It is provided with a glass window for an easy inside view and a powerful stirring system to ensure good temperature uniformity through out the bath. This unit is fitted with Digital Temperature Controller cum Indicator. High Precision Water Bath is also available with (P.I.D.) Controller instead of digital temperature controller.

Particulars	Catalog No.
High Precision Water Bath, 425x250x225mm with Digital Temperature Controller	JA21400
High Precision Water Bath, 450x375x375mm with Digital Temperature Controller	JA21401
High Precision Water Bath, 425x250x225mm with PID Controller	JA21402
High Precision Water Bath, 450x375x375mm with PID Controller	JA21403
