Kidney Stone

Product Image

Description

Kidney stone model is used to provide information about kidney stones (nephrolithiasis) and ureteric stones (urolithiasis). The renal calices, the renal pelvis and the ureter are opened to identify the position i.e in the area of the renal pyramids, origin of the upper calix group, renal cortex, in the connecting tubules of the lower calix group, causing congestion of the minor calices (partially closed partially opened) and in the ureter. Mounted on a base, appropriately coloured and numbered with key card.

Catalog No.

JB100460

Particulars
