# Laminar Air Flow, Stainless Steel

## Product Image

---

## Description

---

The complete structure is made of stainless steel (Grade-304 20G) sheet all over. Environmental air is drawn HORIZONTALLY on work stage. Environmental air is drawn by a balanced blower through pre-filters and is thrown to work chamber through high efficiency HEPA filter retaining 99.97% particulate and Biological contaminants. Tabletop is covered with stainless steel. Front door is collapsible type & side panels are fixed and made of clear thick plexi glass sheet. Including U.V. Tube fluorescent tube light, gas cock and manometer.

VERTICAL MODEL is also available where air is drawn VERTICALLY on the work stage.

**OPTIONAL:** An exhaust system can be provided at the bottom of the unit to throw the air outside the work place.
