Measurement Of High Resistance Using Substitution Method Experiment Apparatus

Product Image

Description

Objective : To Study the High Resistance measurement using Substitution Method.

Features : Continuously variable, Over load & short circuit protected DC regulated power supply of 0-50 Volts. One galvanometer is mounted on the front panel. 100K Ω to 1M Ω Resistances (R) elected through band switch with output on sockets are provided on the front panel.

One potentiometer with output on sockets is mounted on the front panel.

Two unknown Resistances X1 & X2 are also mounted on the front panel.
