Muffle Furnace

Product Image

Description

Muffle furnaces are suitable for high temperature up to 900°C to fulfill the demands of research institutions, industries & R & D centres.

Constructions :

The outer casing is made of thick mild steel finished with epoxy based powder coated paint. Heating elements are made of high temperature kanthal wire surrounding the heating chamber, assuring the most uniform distribution of heat and protects the heating elements against damage and chemical deterioration. Highly efficient and light weight insulation is cast permanently into the furnace body. All furnaces are equipped with a dependable indicator pyrometer having a scale calibrated at 20 °C increments to 1200°C with chromel alumel thermocouple. Thermal fuse, lead wire and plug to work on 220/230 volts AC are also provided.

Temperature:

The furnace can be operated continuously up to 900°C temperature controlled by high quality energy regulator fitted in front of the furnace with two indicating lights.
