Oscillating Granulator

Product Image

Description

Oscillating Granulators improve granule quality by improving flowability and handling. The Oscillating Granulator features a single rotor that oscillates horizontally. At the bottom of the rotor, there is one screen of your desired mesh size that can be simply removed and

remounted, its tension can also be adjusted. Product is fed into the machine from the top via the infeed hopper, and the material falls onto the rotor blade.

High Quality product for use in Pharmaceutical Industry and Laboratory. Following is made in compliance with International Quality Standards and are manufactured using high-grade components and materials.
