Oven, Hot Air, Memmert Type, Aluminium, PID Controller with Fan

Product Image

Description

Hot air ovens are suitable for temperature up to 250°C for chemicals, glassware in laboratories, research institutions, industries, hospitals & R & D centers. They are used in various applications like heating, drying, sterilizing & baking.

Construction : All external cases are made of mild steel, with strong seamless welding & covered with a thick layer of stoved epoxy polyester paint. This provide a strong, highly screech & heat resistant surface for a long lasting attractive finish. Internal surfaces (including the doors) are manufactured from aluminium, with great care in order to eliminate sharp edges. The double walled chamber is filled with high grade insulation to prevent heat loss. Elements are of the sheathed black type. They are put inside beads, placed at the bottom & in both the side ribs for uniform temperature. The door closes on to an asbestos-gasket. The shelves slide neatly into the fixed runners. The fixed ventilators are provided on both sides of the wall. The oven is mounted on four rubber feet to prevent slipping. The control panel houses a main On/Off switch & indicator lamp. Oven is provided with P.I.D. based controller for more precise control. Provided with circulating fan for achieving uniform temperature throughout the chamber.

Particulars	Catalog No.
Oven, Hot Air, Memmert Type, Aluminium, PID Controller with Fan, 355 x 355 x 355mm, 800 watts, 45 litre, 2 shelves	JA22081
Oven, Hot Air, Memmert Type, Aluminium, PID Controller with Fan, 405 x 405 x 405mm, 1000 watts, 65 litre, 2 shelves	JA22082
Oven, Hot Air, Memmert Type, Aluminium, PID Controller with Fan, 455 x 455 x 455mm, 1500 watts, 95 litre, 2 shelves	JA22083
