# Pascal Law Apparatus, Weinholds Type

## Product Image

---

## Description

---

To demonstrate that the pressure of liquids varies with the depth of liquid column and is independent of the shape or size of the vessel. It consists of a base with hole on the bottom and any one of the set of glass vases of different shapes-sizes with identical bottom openings may be attached on the top. A lever arm pivoted to the vertical support rod has a pressure disc on one end to close the hole and a counterpoise pan. A vertically adjustable index pointer is provided to adjust liquid level in the vases.

Custom made configuration is available for developing countries or Ministry of Education Tenders
