Perimeter Priestley Smith

Product Image

Description

The Perimeter is an instrument for accurate charting of the field of Vision. It consists of a vertical stand on which a metallic arc is pivoted. It also has a circular black disc to read the meridian in which the arc is in shape of a semicircle with radius 330 mm. It can rotate in

any direction and can fix at any position with a tightening screw. The arc is graduated from 0° to 90° with a movable test object which is a white color spot of size 10mm diameter painted on a circular disc. It can be moved with arc. An adjustable chin rest and a detachable leveling bar is fixed in front of the metallic arc. A scale and circular chart frame to hold the chart paper in position is provided at the back of the circular disc. A metallic graduated scale with a movable pin-punch pointer is fixed to mark on the perimeter chart paper.
