# RESISTOR RULER

## Product Image

## Description

A wooden base, at least 1 meter in length, with four slots. It operates on the principle of varying resistance of a conductor with length. The setup consists of two or more uncoated wires of the same type, 24SWG, extended along the base (divided into centimeters and millimeters) and fixed onto copper plates. It is equipped with terminal ports for connecting wires and includes additional wires for integrated connections along the base.
