Sliding Microtome

Product Image

Description

- Sliding Microtome is a standard sectioning instrument especially designed for Research Laboratories for cutting sections of paraffin as well as celloiden embedded specimens.

- Sliding Microtome is having the advantage of vertical object feed by micrometer screw and cylinder so rigidly held that perfect in mobility under the knife is ensured even when cutting relatively large, hard and in homogeneous specimens. The heavy knife block mounted on slide ways can be actuated entirely by hand.

Particulars	Catalog No.
Sliding Microtome	JM00490
