Sodium wire Press

Product Image

Description

For extruding sodium and other alkali metals. This is made of heavy iron casting and mild steel. The press fits on a bench by a single half inch bolt with two legs over hanging the

edge of a bench to prevent rotation of the press. The plunger is machined integral with the operating screw and OK. The receiver bottle can be placed on a table which is fixed to the press and is adjustable in height. The machine is supplied with one stainless steel die for extruding sodium into wire of 1 mm. diameter.

Sodium Wire Press

Catalog No. 100231
