# Soxhlet Extraction Apparatus Heating Unit With Glass Parts

## Product Image

## Description

---

Soxhlet Extraction Unit of three or six with fibre glass mantles. It is ideal for carrying out extraction tests. The unit consists of a compact rectangular box section of metal, housing the heating elements and built in controls. The flexible and elastic heating elements ensure close contact with the flask surface and even distribution of heat over the entire surface. In case of spillage, the solvents will either evaporate or escape through the drain holes provided under recess. High thermal insulation of glasswool backing the heating elements minimises the heat losses. Every flask recess is provided with a pilot lamp and a regulator or toggle switch. The built in energy regulators are provided to facilitate good control of temperature. External cases are finished with heat and maar resistant epoxy-polyster paint.

<b>Particulars</b>	<b>Catalog No</b>
Unit of 3 test, 250 ml with 1 regulator	JA21830
Unit of 3 test, 250 ml with 3 regulator	JA21831
Unit of 3 test, 500 ml with 1 regulator	JA21832
Unit of 3 test, 500 ml with 3 regulator	JA21833
Unit of 6 test, 250 ml with 1 regulator	JA21834
Unit of 6 test, 250 ml with 6 regulator	JA21835
Unit of 6 test, 500 ml with 1 regulator	JA21836
Unit of 6 test, 500 ml with 6 regulator	JA21837
