# Study of Transistor Amplifier Circuits (CE, CB & CC Modes) Experiment Apparatus

## Product Image

---

## Description

---

**Objective :** To study Frequency Response, Input Impedance, Output Impedance & negative Feed Back of Common Emitter, Common Base & Common Collector Transistor Amplifiers.

**Features :** Instrument comprises of fixed output. DC Regulated Power Supply  $\pm 12V$ , Circuit diagram is printed and Components mounted on the front panel & connections of important points brought out at Sockets.

**Catalog No.    Particulars**

## Disclaimer

---

The Products details given on this page are indicative in nature and JAPSON reserves the right to change them without prior notice. Buyer is also requested to re-check the specifications and other features of product at the time of order as product development is a continuous process and minor modifications may be made to design based on latest availability, process and design.
