# Transilluminators

## Product Image

---

## Description

---

This mechanism is used for slab gel electrophoresis, Thin layer Chromatography, Forensic examination & D.N.A. Analysis/Experimentation. Transilluminators provide ultraviolet illumination from beneath the sample. They can be used in conjunction with a U.V. viewing cabinet to give greater intensity of illumination.

**Transilluminators 360NM** External case is made of thick steel & covered with a thick layer of epoxy based polyester paint, which provide a strong, highly scratch & chemical resistant surface. This mechanism has a window covered with fixed U.V. transparent sheet, six 360nm.U.V. source are fixed beneath the window. An exhaust fan is fixed for cooling. The hinged eye protective U.V. obstruction cover provided with this mechanism is meant for covering the entire window.

**Transilluminators 312NM** External case is made of thick steel & covered with a thick layer of epoxy based polyester paint, which provide a strong, highly scratch & chemical

resistant surface. This mechanism has a window covered with fixed U.V. transparent filter, four 312 nm U.V. source are fixed beneath the window. An exhaust fan is fixed for cooling. The hinged eye protective U.V. obstruction cover provided with this mechanism is meant for covering the entire window
