Water Wave Generator Device:

Product Image

Description

This device consists of the following components: **Level Tank:** A transparent surface tank with a base that is connected to four aluminum legs, providing stability for the setup. **Light Source:** A top-mounted light source that can either be an LED (operating within a voltage range of 5V to 24V) or a halogen lamp. The light source illuminates the tank, making the waves visible. **Vibration Generator:** A unit with adjustable controls that allow the user to modify the vibration frequency between 10 Hz and 300 Hz. The generator's speed can also be adjusted based on experimental requirements. **Voltage Requirement:** The device requires a voltage input between 12V and 24V to operate. **Mounting:** The light source and vibration generator are securely mounted on the tank, ensuring proper alignment and stability during use.
